### MINING, BUSINESS AND STOCKS

## TONOPAH MAKES FINE SHOWING

Sold Ore During Second Quarter of Year Valued Above A Half Million.

#### MILL READY BY SEPTEMBER 1

Twenty Dollar Ore Will Then be Handled Profitably-Some Important Developments.

Local shareholders of the Tonopah Mining company were in receipt today of checks in payment of the second quarterly dividend of the year of 25 per cent and an extra of 10 per cent. The whole aggregating \$350,000.

In the same envelope was enclosed a statement showing the amount of ore produced, as well as the financial condition of the company at the close of the second quarter, which ended on

During the period 12,139 tons were shipped to the smelters, 13,259 tons were remitted for, 5,259 tons were milled and 4.418 tons placed on the dump. For the ore shipped to smelters was received, \$441,137.70; while the mill product obtained from ore sent to Virginia City for treatment, brought \$84,898.44.

At the beginning of the quarter the company had on hand \$424,869,59 and in addition to the amount obtained from cre sales, \$526.036.14, was received from the Tonopah & Goldfield railroad bonds, \$201,505; royalties, \$11,325.45, and from miscellaneous sources, \$5,492.17. The cash disbursements of the quar-

ter for expense of mining, milling, mill construction and management, aggregated \$415,536.57, not including the dividend of \$250,000 disbarsed in April.

The new 10-stamp mill, now under

construction at Millers, near the city of Tonopah, will be ready for operation about Sept. 1, and one of the directors of the company is quoted as saying that the company would undoubtedly be in position to pay regularly 50 per cent dividends beginning with the last quarter of the present year. With its new mill in operation, \$20 ore can be treated profitably.

Recent developments on the 500 level of the famous Mizpah ledge have dem-constrated that what has been supposed to be the foot wall of the vein hereto-fore, is really ore of a good grade. A cross-cut shows it to have a width of 65 feet, and assays show average returns of about \$35 to the ton. This entire mass, of course, will be broken and sent to the mill for treatment, and means that the channel will contribute towards many future dividends.

#### ON MINING EXCHANGE.

Columbus Con. Conspicuous in Forenoon Transactions,

The participation of several of the priced stocks during poard session of the Salt Lake Stock & Mining exchange this forenoon sent the dated was in demand and the stock closed stronger. The development of new ore bodies in the mine during the week undoubtedly being responsible for the improved condition of the market for that Alta stock. Daiy Judge failed to recuperate from the indisposure of yesterday, while Nevada Hills did bust-ness up to \$2.75. South Columbus also continued strong and Ohio Copper held The closing quotations and

AGAINST UTAH COPPER. Application for Appropriation of Wa-

ter of Adamson Spring Denied.

The application of the Utah Coppe company for the appropriation of the water produced from what is known as the Adamson spring, near the site of the company's new mill at Garfield, has been denied and the protest of Atty. L. H. Grav sustained. The application for this water applies only to the over-

flow and was filed several months ago, but Mr. Gray laid claim to it by reason of both use and possession.

The specific grounds of his claims are that under the old law he filed with the county recorder of Salt Lake county the necessary documents to entitle him to the ownship of the spring and that subsequently he constructed irri-gating ditches for converging the wa-ter upon a large tract of land and that the ownership and possession have re-mained with him undisputed for a long

period of time.

The flow of the spring is estimated to be 12 second feet.

#### MONTANA'S COAL OUTPUT. Geological Survey Has Released Fig-

ures Bearing on Subject. The coal output of Montana amount-ed in 1905 to 1,643,832 short tons, valued at \$2,823,350. The coal mining industry of this state has shown comparatively little change during the last 11 years. Although the production in 1905 exhibited an increase of 284,913 short tons, or 21 per cent over that of 1904, it exceeded by only 130,000 tons the average production during the preceding 10 years and was a little less than the output re-

ported in 1897 and in 1900, The Montana returns for 1905 do, The Montana returns for 1905 do, however, indicate an unusual demand upon the coal mines of the state in that year, for there was not only an increased production but prices showed a decided improvement and the total value an increase of \$628,812, or 28.6 per cent, from \$2,194,548 in 1904 to \$2,823, \$20 in 1905. The average price advanced from \$1.61 to \$1.72 per short ton. The larger part of the coal produced in Montana is sold for locomotive use and the improved couditions last year were doubtless due to increased business doubtless due to increased business with the transportation companies. Notwithstanding the increased production in 1905, the number of men employed was considerably less than In 1904, while the average number of working days was the same. The total number of men employed in 1905 was 2,181, as compared with 2,505 men in 1904. The average number of days worked was 243 in both years. The

worked was 243 in both years. The average production per man in 1995 was 753.7 tona, against 524.5 in 1994.

One mine in Montana was closed frem Jan. 1 to Aug. 19 by a strike which had begun in August, 1994. This mine employed a total of 200 men, and it is the only instance of labor trouble respected in Montana during the year. the only instance of tabor trouble reported in Montana during the year.

There were 58 mining machines in use in Montana in 1905, against 57 in 1904, and 63 in 1963. The machine-mined production in 1905 amounted to 752,665 short tons, or 46 per cent of the total cutput, as compared with 482,824 short tons, or 35.5 per cent of the total out-

#### PLEASING TO MONTANANS.

Helena, Mont., July 26.—An order has been received by B. H. Tatem, as-sayer in charge of the United States assay office in Helena, authorizing the reception of silver contained in gold deposits whenever the amount of silver in such deposits does not exceed in value the proportion of one part silver to 10 parts gold, and pay for the

same at the current rate fixed by the bureau at Washington.

The order, which becomes effective Aug. I next, is balled with delight by mining men as the ratio heretofor-has been one part silver to 20 parts has been one part silver to so parts gold, which necessitated the shipment of much of the product to eastern mints, entailing a delay often of a month in obtaining remuneration. The new order will also have the effect of increasing the receipts of the local office.

## VALCALDA IS A BIG WINNER

W. P. O'Meara Says Silver Peak District is Next Nevada Camp to Boom.

MACHINERY FOR NEW MILL

Now En Route-Nevada-Alpine Shipping a Car Per Week-Never Looked Better.

After an absence of about two months in the camps of Nevada and along the shores of the Pacific ocean, William P. O'Meara returned to the city last evening, leaving Mrs. O'Meara at the Hotel Arcade at Santa Monica. Mr. O'Meara brings some interesting

information about the Silver Peak, and believes that district is booked for the next boom in southern Nevada. The company which took over the Blair mines not long ago and which was promoted by M. L. Effinger of this city is getting ready to do busiess on a large scale. So is the Valcalda company, controlled by the O'Meara-Lynch company. The ma-chinery for te ten-stamp mill to be erected on the Valcalda is enroute and M. J. O'Meara and Thomas J. Lynch are now on the ground prepared to re-ceive it. The plant will be erected near the main workings of the mine, and will be put up under the immediate direc-tion of Curtis L. Knight, the company's ton of Curis L. Knight, the company's engineer. A pipe line is being laid to bring water into camp from a point four miles out, and it is expected that it will be ready for commission some time in September. The mill, if everything goes well, will begin ore treatment about Oct. 1.

The deposits of the Valcaida property.

The deposits of the Valcalda property are extensive and there is not much doubt but that it will develop into one of the greatest producers of gold in southern Nevada. It has been demonstrated through a long series of experiments that the Valcalda ore can be treated so low that anything containing \$5 values will pay. Recently an eightfoot breast showed average assays of \$52 per 100.

\$52 per ton.

The Nevada Alpine Mining company, another O'Meara-Lynch corporation, operating at Lone mountain, near Tonopah, is shipping a car of ore per week and a message received last night from M. J. O'Meara contained the infor-mation that the mine never looked as

good as it does now.

Tonopah, as well as all other big camps in southern Nevada, are in a very satisfactory condition, Mr. O'-Meara reports, at the present time, and Tonopah in particular, is displaying quite a building boom. He believes Tonopah will continue to be the hub of

#### FOUND ANTIMONY MINE. Thompson Campbell of Buttle Becomes Interested in Utah.

Thompson Campbell, one of Butte's ell-known attorneys, has returned home, says the Anaconda Standard, from a tour of the southwest in search of mining properties for a syndicate of capitalists, of which he is one, and orts having found in Garfield county. Utah, an antimony mine that is likely to be heard from in the future. The mine is 40 miles from the ter-minus of the Rio Grande & Western railroad. The vein is flat and has width of from six to eight feet. M impbell says the ore runs from 10 to per cent in antimony, and in view the fact that this metal is value \$500 a top, and there is \$10,00 worth of ore on the dump, it is not a bad proposition. Mr. Campbell has tied the property up and will inter-est the syndicate in it.

#### FAY AND GOLDSPRINGS.

William H. Perry, the owner of sevoral southern stage lines, is in the city. He says Fay, Nevada, is looking up and indications point to a long are of prosperity in that camp. Mr. Perry has much faith in the future of Coldensias. Goldsprings, a few miles east of Fay, where Charley Short is opening up at least two "cod producers.

#### CONCENTRATES.

The Carisa dividend of \$5,000 was disbursed today.

Alex Colbath is expected home from California tomorrow. The Mexico Consolidated Mining company has disbursed its July dividend of \$120,000.

Hugh Tarbet, who has been on a prospecting trip into Nevada, has returned home.

The Bingham Central stock pool has

been dissolved and something like 294,-

000 shares have been released H. S. Joseph is in Colorado Springs mining business. He is expected home about the end of the week.

Capt. Duncan MacVichie departed yesterday for California with the Bal-aklalla properties as his destination. R. L. Colburn, the Tonopah mining operator and wife, are in the city, and will leave for southern California to-

Donald B. Gillies and Malcolm Mc-Donald, identified with the Schwab mining interests in Nevada, have been Butte several days.

E. J. Moore, Colorado manager of the Mining & Scientific Press of San Fran-cisco, is in the city in the interest of that well known mining publication.

Arthur L. Pearse, consulting engineer for the Utah Apex properties, has returned from a trip to the eastern of fices of that company. Thefore and bullion settlements re-

ported late yesterday by McCornick & Co. were: Crude ore and concentrate, \$49,500; base bullion, \$46,000.

Bingham Consolidated properties has been in Butte several days for a con-sultation with F. Augustus Heinze. Brent Keysor, representing the Bal-timore Copper Smelting & Rolling com-pany, is here from Baltimore, Md., and will visit some of the valley smelters.

The Utah mine of Fish Springs yesterday drew down the proceeds from a lot of ore from which was realized \$3,796. The ore assayed 50 per cent lead

and 94 ounces in silver. General Manager H. L. Charles of the Bingham Consolidated Mining & Smelt-ing company returned from Montana this morning, where he has been in conference with F. Augustus Heinze.

S. M. L. McSpadden, formerly pur-

chasing agent of the Utah Copper com-pany, has returned to Colorado to re-side permanently. Mr. McSpadden en-joys the acquaintance of a large circle of friends here. Col. E. A. Wall and daughters departed yesterday on a trip to the north-

west. They will join the Guggenheim party at Vancouver and proceed from there to Alaskan points. Col. Wall ex-pects to be absent from home about It is learned that the Radeliff mine at Ballarat, Inyo county, Cal., is now un-der option to Salt Lake mining men who propose examination of the property proving satisfactory, to reopen it on a very extensive scale. This proper-

ty has been idle for some four years .-

M. M. Johnson, of the Newhouse staff returned yesterday from a trip to the Furnace range of mountains, where he was ordered to examine into the merits of a copper proposition brought to the attention of Mr. Newhouse prior to his departure for Europe. On account of the intense heat, Mr. Johnson says, the region is almost impenetrable at this time of the year and the particular part of it which he went to see had little to commend it to the investing

The investigation of the black sands of the Pacific coast, which has been carried on for over a year by the United States geological survey, at Portland, Or., will be continued until the first of September. After that the plant will be transferred to Chapel Hill, N. C., where a similar work will be car-ried on in connection with the geological survey of the state. It is believed that the sands of the eastern coast will be found as rich in valuable minerals as concentration experiments have shown those of the Pacific slope to be.

Mr. W. C. Phalen of the United States geological survey, has recently made an examination of copper deposits southern Nevada country, but that in Rappahannock county, near Wash-Builfrog district will win the dis-tion of being the Klondike of the the copper deposits of the whole Appalachian region is being prepared under the direction of Mr. Walter Harvey Weed. The forthcoming "Economic Bulletin" will contain a report on copper deposits around Luray, Va., which are similar to those recently examined by Mr. Phalen.

## STOCK MARKET CONTINUES DULL

Opening Was Fairly Active With Some Substantial Gains.

BECAME VERY IRREGULAR.

Dropping in St. Paul Made Operators Very Shy About Buying.

New York, July 26.-The opening dealings in the stock market today were active and widely distributed and at substantial gains in the majority of stocks. Southern Pacific was the notable exception and fell an extreme point on running sales at the opening.

The first hour's business showed activty, and variety and more strength develped at different points than yesterday. Southern Pacific, Union Pacific and St. Paul showed evidence of realizing sales. The advances were Great Northern preferred and Delaware & Hudson 2½. New York Central Ph. and Reading. Northern Pacific. Wabesh, Amalgamated Copper and Republic Steel preferred about a point, and United States Steel %. The market developed an irregular tenency during the second hour. Colorado uel rose 1, and Tennessee Coal 14. St. aul sagged below last night under profit-sking. The market was very dull at one aking.

noon.
Bonds were heavy.
The market came to a standstill, stocks holding their advances, but reactionary issues showing no recovery. Dealings decreased to nominal propertions. Sugar lost 14 and Consolidated Gas 1.
St. Paul ran off 1% to below 180 and increased the disinclination of operators to take on stocks. Prices elsewhere sagged moderately, but the dealings were profoundly dull.

There are no more Texas watermelons in the local markets, but their place is well supplied from California and Nevada. There is a great rush of cantaloupe melons to this city from Moapa, the local receipts having been nine cars in less than a week by a single was tide wholessle house and two gle west side wholesale house, and two more cars are on the tracks now. Wholesalers report an increasing demand in eastern markets for the Moa-pa melon on account of its strong saccharine properties, and that region in Nevada is also securing a strong hold on the general market with its peaches,

LOCAL MARKETS.

pears plums and other fruits.

The local receipts include car loads of bananas, lemons, onions, watermclons and oranges, with broken car shipments of a wide array of fruits both large and small, with egg plant from Texas, tomatoes and peppers from California. There is a slight fall in prices in green corn, also in spring chickens. Lemons are down a bit, so are new potatoes, which have become more plentiful. The prices obtaining in the markets today, are as follows:
